

THIS TERM

Written by Mr Bevan

Welcome to the Autumn 2 curriculum newsletter, which celebrates maths at Race Leys Junior School!

There have been some big changes in maths since the start of the academic year, as we encourage children to embrace the challenge of this subject in order to value and learn from the mistakes that they make or areas that they do not understand.

In order to support with this, children are now thinking more regarding how they feel about the learning intention for each lesson. Some of our children will not be secure in their understanding and therefore need more practice, which is our first level of challenge. Other children may feel like they are ready to jump in and have a go, which is our second level. Confident children may feel like they fully understand the learning and can dive deeper into the content, which is our final level of challenge.

We would like to remind our families that we continue to subscribe to times tables rockstars, which is available both online and as an app and has lots of interactive games and activities that will help your child to learn their times tables. This is especially important to our year 4 griffins, who will complete the national multiplication check in June. Please speak to your child's class teacher if you need your login details for this.
